I respectfully urge you to reject the NAB Petition 04-160. As a Truckdriver (Owner Operator) I use my XM radio to its fullest. The traffic and weather channels allow me to determine both travel time and alternate routes before I get into traffic problems. With local broadcasting, if and when you can get a traffic update, it is totally useless compared to the present XM reports. I pay for this special service and feel that the NAB does not have the authority or need to interfere. Presently there isn't a comparable service being provided by NAB stations nor do I feel that any NAB stations have a want or the ability to provide a comparable service.
